Functional Description Report

What is needed and why?

- You have now done a presentation of your block
 - Hopefully you now have a slightly better overview
 - For now: Overview is your friend
 - And I/we have an idea of how you understand your task.
- This needs to be refined still on a functional level
- Main target groups:
 - Yourself
 - Rare cases those groups who interface to your block or learn from you otherwise
 - The teachers and supervisors
- Should be documented in Functional Description Report

Overview and Function

- Overview and function
 - Overall
 - The main purpose (basically like the presentation)
 - System if part of a larger system or
 - Context where this is application
 - Scoped
 - What should your block do?
 - Requirements if applicable
- Description of each subblock / function in your design
 - How is the project / block chopped into subblocks
 - As precise as possible given overall constraints

Background and theory

- **Background information**
 - Maybe preliminary literature study
 - Relevance for stakeholders
 - Where is the missing gap (if relevant)
- **Theoretical background**
 - Short description of the necessary theory
 - How the theory is tailored to your usecase
 - E.g. physics behind Quantum

Implementation expectations

- **Implementations platforms**
 - Chosen platform and why – possible tradeoff/challenges
 - For some of the projects this is given – for some it is quite open ended
 - How will the choice of implementation platform influence the functional design.
- **Preliminary analysis/ simulation**
 - E.g study of error correcting performance of codes (simulation)

Functional Description Report

- **Interfaces**
 - Who are we playing with?
 - Standards?
 - Electrical interfaces?
- **Detailed timeplan**
 - In week granularity
 - “Planning is essential, the plan is useless” (Derived from Eisenhower)
- **These points DO NOT constitute a Table of Content**
 - Your project -> your structure
 - No one size fits all
 - More some indicators of what should be included.
- **Good Functional Description Report -> Easier work later as reuse is allowed.**

Remember: This is a report

- With all the report formalities surrounding the prev. described content
- Abstract
- Table of content and page numbers
- Introduction
- Conclusion
- References – as specific as possible
- Figure and table captions
- Cross references to figures, tables, sections
- Front page (with name of your group)
- Necessary meta texts
- Deadline: Friday 29th of March 23:59
 - Very welcome to handin before

Rest of today

- Group work
- Continue description and specification work
- Think in time planning.
- Begin writing the report.
